

Option B — Left-to-right process flow

Legend (both): thick solid = driver (information); thin grey = L6 modulator (gain/state); dashed = top-down feedback. Numbers 1–7 trace the signal: sensory input → first-order relay → L4 → L2/3 → L5 → L6, with L5 → higher-order relay → next area.

Option B (detailed) — Full flow with thalamus, TRN, and connection classes
