SUMMARY

Service-oriented engineer with 4+ years across enterprise IT, cloud governance, and service delivery in regulated (financial-services) environments. Owns cloud identity and access governance company-wide, automates recurring operational processes, and builds the reporting that makes service quality measurable. Salesforce-certified across Service and Sales Cloud, with strong stakeholder management and a track record of reliable delivery. Seeking a Digital Workplace / IT Support Lead role that combines hands-on technical ownership with an excellent end-user experience.

CORE SKILLS

- **IT Service & Workplace:** IT service management (ITSM) concepts, service metrics & reporting, knowledge management, case/request handling via Salesforce Service Cloud, end-user & stakeholder support
- **Identity, Access & Security:** cloud identity & access governance (Azure, GCP), SOC 2 assessment, partnering with security & infrastructure functions
- **Cloud & Platforms:** Microsoft Azure, Google Cloud Platform, Docker, Git
- **Automation & Reporting:** workflow automation, scheduled agents, RAG / LLM tooling, Power BI dashboards, Python
- **Ways of Working:** Agile / Scrum, Jira, Confluence, requirements & process mapping, distributed teams

EXPERIENCE

Cloud Governance (Working Student) — Deutsche Börse Group, Frankfurt

Mar 2026 – Present

- Own end-to-end cloud service whitelisting across Azure and GCP company-wide — assessing services against security and compliance criteria (SOC 2, SLAs), leading the recurring cross-team review call, and acting as the operational and technical point of contact for cloud service governance.
- Partner with security and infrastructure functions to keep cloud identity, access, and services secure and compliant in a heavily regulated financial environment.
- Automated a core recurring governance process with RAG-based agents (Azure & GCP) that ingest SOC 2 reports and crawl official documentation, returning findings with source links and page-level citations — cutting service-whitelisting turnaround by ~75%.
- Built a scheduled per-cloud agent that tracks Azure and GCP release notes weekly and flags updates and deprecations to the team.
- Built Power BI dashboards tracking whitelisted services, SOC 2 deviations, and active service regions — making service quality and coverage visible and measurable.

Product Manager (Working Student) — Deutsche Börse Group, Frankfurt

Jun 2024 – Feb 2026

Eurex / Member Section digital client platform

- Designed and delivered “Eurex AI,” an internal LLM-powered assistant that resolves client queries — selected from an internal hackathon and moved into production for operations teams, improving self-service and reducing support load.
- Supported migration of legacy SAP workflows to Salesforce Service & Sales Cloud in a large-scale SaaS transformation — led process mapping, requirements, and validation with developers.
- Owned the feature backlog for a platform serving global Eurex members — the point of contact translating international client needs into prioritized, delivered improvements.

Business Analyst / Consultant — MTX Group Inc., Hyderabad, India

Sep 2021 – Sep 2023

US public-sector digital platform projects

- Delivered a full digital licensing platform for the State of Wisconsin in under 12 months, from requirements to UAT, using low-code / no-code.
- Owned end-to-end delivery across 3 large government programs (Wyoming DFS, Massachusetts DOT, Wisconsin DSPS), ensuring on-time Agile releases across distributed business, dev, and QA teams; recognized with an “Above and Beyond” award (2022).

CERTIFICATIONS

- Salesforce Certified Administrator (Jan 2022)
- Salesforce Service Cloud Consultant (Jul 2022) — service management & case handling
- Salesforce Sales Cloud Consultant (May 2022)
- Deep Learning — IIT Madras / NPTEL (2020)

EDUCATION

M.Eng. Information Technology — Frankfurt University of Applied Sciences

Oct 2023 – 2027 (expected)

Focus: AI / ML, computer vision, cloud computing

B.Tech. Electronics & Communication Engineering — CEM Kolaghat, India

2017 – 2021

Final grade: 8.56 / 10
